The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/695,613

Applicant(s)

PAOLINO, LILLIAN R.

Examiner

HUNG X. DANG

Art Unit

2873

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 March 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) 1-12 and 16-22 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 13-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-8508)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

Claims Rejection Under 35 USC - 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Thayer et al (6,131,209)** in view of **Beames (D 466,543)**.

Thayer et al discloses eyewear comprises solid frames 60 having a lens; said frame 60 consisting of a one piece solid molded frame; said frames having a nose bridge which fits on top of a user's nose; said frames secured around a user's head by a single band 52; said band 52 secured to said frames 60 by two securing pieces wherein said band 52 is removed from said frame by either or both of said securing pieces wherein Velcro is used for both securing pieces; wherein said band 52 can be totally removed from said frames and replaced with other similar bands. (see at least figure 5 and the related disclosure.)

Thayer et al teach a single lens in the frame, Thayer et al does not teach that a pair of lenses as that claimed by Applicant.

Eyeglasses have long been designed with the general objective of correction the vision of the eye of the wears. Numerous designs of dual lens glasses and single lens glasses have been developed, differing only in aesthetic feature.

Beames, however, discloses the frames having a pair of lenses. Because Thayer et al and Beames are both from the same field of endeavor, the purpose of aesthetic feature as disclosed by Beames would have been recognized as an art pertinent art of Thayer et al.

It would have been obvious, therefore, at the time the invention was made to a person having skill in the art to construct the eyeglasses frame, such as the one disclosed by Thayer et al, with a pair of lenses, such as disclosed by Beames for the purpose of the purpose of aesthetic feature.

Claims Rejection Under 35 USC - 103

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sadowsky (5,042,094).

Sadowsky discloses eyewear with prosthetic parts for small children comprises frame (30) for holding two lenses (20), the frame (the frame 30 is constructed with

Art Unit: 2873

resilient material, preferably also soft and pliable see column 3, lines 21 and 22) secured to a head by a band (40), said band (40) secured to the frames by two securing pieces (42) including Velcro is used for both securing pieces and the band (40) can be totally removed from the frame and replaced with other similar band (see figure 1 and the

related disclosure.) Note that solid frame means the frame having the interior completely filled up and free from cavity, or not hollow.

Claims Rejection Under 35 USC - 102

3. Claim 13 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by **Laschober** (4,930,885).

Laschober discloses eyeglasses with releasable headband support arrangement comprises one piece solid molded frame (14) for holding two lenses (16), the frame (14) having a nose bridge (18) with fits on top of the user nose, the frame (14) secured to a head by a band (28), said band (28) secured to the frames by two securing pieces (30), wherein the band (28) is removed from the frame by either or both of the securing means (see figures .1-4 and the related disclosure.)

Response to Applicant's argument

4. Applicant's arguments filed 3/17/08 have been fully *considered* but they are not

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Eyeglasses have long been designed with the general objective of correction the vision of the eye of the wears. Numerous designs of dual lens glasses and single lens glasses have been developed, differing only in aesthetic feature. Beames, however, discloses the frames having a pair of lenses. Therefore, at the time the invention was made to a person having skill in the art to construct the eyeglasses frame, such as the one disclosed by Thayer et al, with a pair of lenses, such as disclosed by Beames for the purpose of the purpose of aesthetic feature. Therefore the claimed invention does not distinguish over the cited art.

Applicant argued that "Amended claim 13 requires that the sunglasses consist of solid frames which consist of a one piece solid molded frame and the frames being secured by a single band. Sadowsky that the frames are pliable and not solid as taught in the amended claims. Further Sadowsky requires nose and temple pieces for supporting the frame of the baby's face. For these reasons claims 13-15, are not anticipated or obvious over Sadowsky. "This argument is not persuasive because the frame 30 could make by any plastic material (see column 3, lines 24 and 25). Thus the

frame 30 is solid material. Therefore the claimed invention does not distinguish over Sadowsky device.

Applicant's argued that "Since the claims of the present invention use consisting language, and Laschober requires connector members and attachment members, which are outside the scope of the claims, the claims are not anticipated or obvious. Further since the claims require that the band is secured directly to the frames, and Laschober requires that the band is secured to the attachment member which is then secured to the connector member, the claims are further not anticipated or obvious over the prior art." This argument is not persuasive because the Laschober device teach every features of the claimed invention. Laschober discloses eyeglasses with releasable headband support arrangement comprises one piece solid molded frame (14) for holding two lenses (16), the frame (14) having a nose bridge (18) with fits on top of the user nose, the frame (14) secured to a head by a band (28), said band (28) secured to the frames by two securing pieces (30), wherein the band (28) is removed from the frame by either or both of the securing means (see figures .1-4 and the related disclosure.) . Applicant's arguments do not comply with 37 CFR 1.111(c) because they do not clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. Further, they do not show how the amendments avoid such references or objections.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication should be directed to Examiner Dang at telephone number (571) 272-2326.
